

## An Important Message for all Australians

Fellow Australians,

In 2014 I presented to Federal Parliament a private member's bill to set up the Australia Fund. A copy of the bill can be accessed at this link [www.unitedaustraliaparty.org.au/australia-fund](http://www.unitedaustraliaparty.org.au/australia-fund)

The Australia Fund's intention was to support Australians in time of natural disaster, but both Labor and the government worked together to defeat it in parliament.

We must do whatever is required to protect and defend the interests of Australians.

If the government and Labor hadn't blocked this bill, it would have been there to provide hay, other feed and real financial support to all farming families and rural communities impacted by the drought. To protect and defend our agricultural industry is a matter of national security.

You can be sure that foreign, state-owned companies are lying in wait to buy up our farms when Australian farming families' lives have been destroyed. We must act to save them! It is in the nation's interest that we do.

We are losing Australia to a foreign power and all our politicians are not up to the task of stopping it.

I'm 65-years-old. Australia has been good to me. To whom much is given, much is required. I don't care how much I am personally attacked or our party is criticised by the Labor Party and the media, because I have a strong resolve not to let you down.

I am going to do all I can to put your interests first, but I can't do it alone. I also have the support of over 5,000 people in the United Australia Party who have the resources and the will to make a change in Canberra.

The United Australia Party is a party of three former Prime Ministers of Australia who served in times of depression and war. We believe in what they did - putting Australia first and making our country great.

Join the party by going to [www.unitedaustraliaparty.org.au](http://www.unitedaustraliaparty.org.au) and offer yourself for public service. The United Australia Party will support you and together we can change the country. Only you can change the government - our future is in your hands.

Remember, Labor and the Liberals gave fifty thousand million dollars to the NBN and only two hundred million dollars to farming communities.

It's clear they don't care about you! They fight among themselves, fight each other, but they sure don't fight for you. It's time for Australians to wake up and start putting Australia first. Vote for the United Australia Party.

Together we can achieve the extraordinary.

All the best,

Clive F Palmer  
Federal Leader  
United Australia Party
